

Clay Micholaz Fu

Full-Stack Developer | Informatics Student

081385967782 | claymicholaz@gmail.com | Jakarta, Indonesia | claymicholaz.vercel.app

SUMMARY

Full-Stack Developer and Informatics student at Bunda Mulia University with hands-on experience building web and mobile applications using React, Next.js, Node.js, ASP.NET, and Kotlin. Experienced in developing and deploying end-to-end solutions through academic projects, personal products, and a full-stack development internship. Passionate about creating scalable applications, solving real-world problems, and continuously expanding technical expertise.

EDUCATION

Bunda Mulia University

Bachelor of Informatics | GPA: 3.79 / 4.0 | Jakarta, Indonesia

August 2024 – Present

Budi Mulia High School

High School Diploma | Jakarta, Indonesia

May 2021 – May 2024

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Blazor

Backend: Node.js, Express.js, ASP.NET, PHP, Python, MySQL, Kotlin

Tools: Git, GitHub, Zustand, C#, MongoDB, Supabase, Android Studio, Visual Studio

Soft Skills: Problem Solving, Analytical Thinking, Teamwork

Languages: Indonesian (Native), English (Advanced – EFSET C1)

PROJECT EXPERIENCE

Clinic App – Mobile Development Final Project

2025

Team Leader & Android Developer | Bunda Mulia University

- Led a team of developers to build a full-featured Android clinic app as a university final project, coordinating feature assignments and guiding team members throughout development.
- Built with Kotlin and Android Studio, the app supports three user roles: patients (book consultations, chat with doctors), doctors (respond to consultations), and admins (handle payments and manage data).
- Designed the app architecture and oversaw end-to-end delivery from planning to final submission.

UMKM Mapper

2025

Full-Stack Developer | Human-Computer Interaction Final Project

- Built a full-stack web app to map and display UMKM (small business) data, deployed at umkm-mapper.vercel.app.
- Developed the frontend with React.js and the backend with Node.js and Express.js, using MongoDB as the database.
- Delivered as a university final project, applying HCI principles to create an intuitive, user-centered interface.

Flowtab – Personal Expense Tracker

2024 – 2025

Solo Developer | Side Project

- Built a personal finance tracker that automatically parses BCA transaction emails via IMAP and displays spending in a live dashboard, hosted at flowtab123.vercel.app.
- Developed with Next.js, Node.js, Tailwind CSS, and Supabase; implemented IMAP email parsing to extract and categorize transaction data in real time.
- Designed and shipped a complete end-to-end product independently, from backend email parsing to frontend dashboard visualization.

[Vidio Belajar – E-Learning Landing Page](#)

May 2025

Front-End Developer | Harisenin Final Project

- Built a fully responsive e-learning landing page using React.js, Tailwind CSS, and Zustand for state management.

- Collaborated with a team to deliver a polished UI within project deadlines, following component-based architecture.
- Implemented clean, maintainable code with Node.js on the backend to serve application data.

Todo List App

May 2025

Front-End Developer | Self Project

- Developed a feature-complete Todo List application using vanilla JavaScript, HTML, and CSS.
- Designed an intuitive, user-friendly interface focused on simplicity and ease of use.
- Practiced DOM manipulation, local state handling, and responsive layout techniques.

INTERNSHIP EXPERIENCE

Full-Stack Developer Intern – Profescipta Wahanatehnik

November 2024 – May 2025

Unpaid Internship | Full-Stack Development | Jakarta, Indonesia

- Gained hands-on experience with C#, Blazor, and ASP.NET in a professional enterprise environment using Visual Studio, under mentor guidance.
- Developed the Report Approval Employee feature — a module that generates and prints official day-off approval forms for employees working outside normal hours.
- The feature produces a formal document reviewed and signed by HR and the CEO to authorize additional work time compensation, integrating into the company's existing HR workflow.

ORGANIZATION EXPERIENCE

BIOS – Web Developer Division

August 2024 – Present

Bunda Mulia University, Jakarta

- Contributed to web development projects using the MERN stack within a collaborative student team.
- Built and maintained features using JavaScript and React.js as part of organized sprint-based workflows.
- Developed skills in version control, code review, and agile team collaboration.

CERTIFICATIONS & TRAINING

Full-Stack Developer Bootcamp – Harisenin

May 2025

[Completed intensive training covering HTML, CSS, Git, JavaScript, Tailwind CSS, React.js, Node.js, Express.js, Zustand, and MySQL.](#)

Responsive Web Design – freeCodeCamp

May 2024

[Certified in responsive web design principles including HTML and CSS.](#)

EFSET English Certificate – C1 Advanced

May 2025

[Demonstrated advanced English proficiency \(C1 level\) through standardized testing.](#)
